Connect to UofA Wireless network – Windows 10

Introduction
This guide will assist you in connecting your Windows 10 machine to the UofA wireless network.
Please note that this will automatically connect you every time you are within range, until you change your password.

- If you are experiencing difficulty connecting, please try the UofA wifi assistant app Onboard, accessible here.

Procedure

1. Ensure you are at your desktop by pressing the Windows Key whilst in the start screen.
2. Click the Wireless icon in the taskbar (bottom-right)
3. Select UofA Wireless Network from the wireless list
4. Press Connect
5. When prompted to log in, enter your University username followed by @adelaid.edu.au (e.g. a1234567@adelaid.edu.au) and your university password
6. If you are prompted to continue connecting, press Connect.

You will now be connected to UofA wireless.
